FOR MORE INFORMATION, VISIT FIRST3YEARSTX.ORG/PAR-TEE-FOR-BABIES
OR EMAIL INFO@FIRST3YEARSTX.ORG

Why the First3Years?

The first three years of life are an extraordinary and vital part of our children's growth and development. 85% of brain development happens by the time a child turns three years old. During these first three years of life, the brain is making connections that will become the foundation for all other learning.

First3Years was founded in 1980 by early childhood clinicians who were concerned about the quality of care young children receive. Empowered by the neuroscience showing 85% of early brain development happens by age 3, they wanted to create opportunities for all infants and toddlers' early health and development to be supported during this critical developmental period.

At the center of their vision was the understanding that everyday interactions and play, along with responsive, nurturing care can build healthy brains, and a strong start for all children. Best of all, it's easy to teach parents and other caregivers to be involved.

Today, First3Years has become a trusted expert and advisor on all things related to infants and toddlers, from positive parenting tips to quality child care to foster care, First3Years is a trusted source for helping children and families thrive.

Each year our programs impact more than 154,000 children annually through our work to:

- Increase awareness of the critical importance of the first three years of life.
- Support conditions that enhance the quality of infant and toddler/caregiver relationships.
- Advocate for policies and practices that support the healthy development of young children, and
- Educate the birth-to-three workforce in best practices.

First3Years' vision is that all infants and toddlers are provided with safe and secure experiences that promote a firm foundation for positive lifetime outcomes. Our work is to continue building the capacity among professionals, programs, and systems to support families through positive attachment, trauma informed care, responsive caregiving and access to services that meets their physical and mental needs.
